3 Discussion

Excursion The group discussed potential excursions. Vidar will reach out to Elekta and RaySearch for a potential visit. Li mentioned a possibility to visit Scania. Stefan will contact Dirac for a potential visit. It was noted that the target company for the next excursion is yet to be finalized.

Seminars and Talks The participants engaged in a discussion about seminars and talks. Given the frequency of academic seminars at both the department and division levels, there's a consensus that inviting speakers from the industrial sector will provide valuable insights from different perspectives. This approach aims to assist student members in gaining a well-rounded understanding of the field.
